Operation Manual
Qi-Shield

The Qi-Shield

What to expect from the Qi-Shield and how to use it?

Thank you very much for choosing the Qi-Shield. With our latest mobile device, you are protected from radiation caused by communication technology, both at home and on the road. Thanks to its small size and light weight, you are able to move freely without having to sacrifice radiation protection.

Numerous scientific studies prove: radiation is harmful to our health. Possible consequences are sleep disorders, headaches, lack of energy, tiredness and lack of concentration. The Qi-Shield reduces the health effects of electromagnetic radiation verifiably – regardless of whether it is your own terminal device, your neighbor's WiFi or even satellites and radio towers. Optimal long-term protection is your profit.

The Qi-Shield works even more intensively if you touch the copper ring for a few seconds several times a day. The more often you interact with the device, the stronger you will perceive the effect and change. In order to further improve the results of our device at night, you yourself can also reduce other sources of radiation and co. by, for instance, turning off the WiFi or installing a mains cut-off unit for the bedroom.

- ↘ You can find further information on the effect and construction of the Qi-Shield on our YouTube channel.

Product Description

Technical data

Product	Qi-Shield;
Measurements	Ø = 8 cm, h = 16 cm copper sleeve: 7 cm, 2 mm wall;
Sphere of Action	stationary: 2.5 m in radius mobile: 1.5 m in radius;
Weight	approx. 825 g;
Ring	copper, raw or nickel or gold plated
Wood	walnut, oiled

Please note:

- ↘ Each Qi device is unique: grain, shading and color may vary slightly.
- ↘ Wood is a natural product, the weight is subject to fluctuations, e.g. due to more knotholes, etc.

What distinguishes the Qi-Shield:

- mobile applicable
- 5G-optimized
- EMF protection available

Benefits of Qi technology:

- Reduces the effects of technical radiation sources;¹
- According to studies, electromagnetic radiation is less harmful;¹
- Studies suggest effectiveness of our devices;¹
- Modern technology can therefore be used without hesitation;
- Restful sleep thanks to essential oils in Qi devices made from pine wood;²
- German hand-made technology;
- Each year, several thousand customers trust Waveguard with their radiation protection.

OXIDATIVE STRESS

Qi technology positively affects our biology:

- it has an antioxidant effect, reduces body stress reactions (oxidative stress);¹
- it improves regeneration and wound healing;¹
- it increases vitality, wellbeing and relaxation.¹

Handling

How do you set up the Qi-Shield correctly?

- Remove the Qi-Shield from its packaging carefully. Please follow the instructions on the outer packaging. The device contains glass parts. Therefore, please protect it from falls and blows.
- Place the device where you spend most time in your home. The device works through a wall thickness of 40 cm and has an effective radius of max. 2.5 m in stationary operation.
- When setting up your Qi-Shield, find a free space and keep a distance of at least 25 cm from all surrounding power sources (e.g. sockets), power cables and electronic devices (e.g. radio, TV etc.).
- Protect your Qi-Shield from humidity and intense heat, e.g. from heaters, ovens and direct sunlight.
- Protect your Qi-Shield from humidity and strong heat, e.g. from heaters, ovens and direct sunlight.
- Once the Qi-Shield has been placed in a fixed location, it only takes a few minutes for the energy field to completely build up.

Safety Instructions

Please read the following instructions carefully before using your Qi-Shield and keep the manual for future reference! Waveguard GmbH accepts no liability for damage resulting from failure to observe these operating instructions.

↳ Climate

The Qi-Shield has been designed for indoor use. The device may be stored outside. In order to ensure that your Qi-Shield functions properly, a permanent and as constant as possible ambient temperature between 5 °C and 40 °C should be maintained. Exceeding or falling below this temperature range can lead to damage and thus to an impairment of functionality. The product must also be protected against rain, moisture and humidity of all kinds. Please avoid strong fluctuations in humidity and temperature, as both lid and base are made of solid wood which, as a natural product, "works" (expands and contracts) when subjected to climate changes. Cracks in the wood can occur, but these do not affect the functionality.

↳ Transport

The best way to transport the device is to hold it by the copper sleeve. Our devices are fully protected for shipping.

↳ Other notes on use

The Qi-Shield must not be placed in the microwave. Do not place objects such as vases, liquids, burning candles, food, crystals or stones on your Qi-Shield. Changes to the device are not permitted. The Qi-Shield must not be opened. If the device is manipulated, it loses its effect and our company's warranty.

Persons with reduced mental, sensory or psychological abilities and lack of experience / knowledge can use the Qi-Shield if they are supervised or instructed in the safe use of the device, and if the resulting dangers are understood.

↳ Child safety

Keep packaging parts away from children, as there is a risk of suffocation and injury. Do not allow children to play around or with the Qi-Shield or move it unattended. There is a risk of injury from the weight of the device. Please note that the Qi-Shield is not a toy for children.

Care and Cleaning

- ↳ To clean the Qi-Shield, wipe it with a damp micro-fiber cloth with no cleaning additives, and then wipe with a dry cloth. Please do not use a scouring cloth or sponge for cleaning, or any harsh or caustic cleaning agents, abrasives or solvents, e.g. alcohol, acetone or cleaning benzene.
- ↳ Under any circumstances, avoid exposing the Qi-Shield to moisture over a longer period of time, as this can damage the wood. Never clean your Qi-Shield under running or standing water.
- ↳ The wood can be taken care of independently with natural oils.

Warranty

Our products are subject to strict quality control. However, if the Qi-Shield you have purchased should not function properly, we deeply regret it and would ask you to contact your local sales representative or authorized customer service. Waveguard GmbH warrants to the private purchaser that the Qi-Shield is free of material defects at the time of delivery for a period of two years from the date of purchase. During the warranty period, you have the option of having the device repaired twice, or exchanging it for a defect-free copy if a material defect is present. If the device is not faultless even then, we will refund the value of the goods.

The following steps are necessary to claim the warranty:

Please contact us by phone. You can reach us at the following phone number:

+49 (0) 3591 - 5 94 75 43

You are also welcome to describe the problem to our customer service by e-mail. Please write to the following e-mail address:

<mailto:contact@waveguard.com>

Please include your name, your customer number and the invoice number of the purchase receipt.

If a return for inspection is agreed upon, please send the device in its original packaging with a suitable outer packaging to the following address:

**Waveguard GmbH
Bahnhofstraße 16
02625 Bautzen
Germany**

The costs of sending the device for inspection shall be borne by the customer.

Warranty claims are excluded in case of damage caused by:

- ↘ obvious non-observance of these operating instructions
- ↘ abusive or improper treatment
- ↘ external influences (e.g. cold, heat, humidity, grease, overvoltage, dust) to which the device was exposed by the customer
- ↘ use of force (e.g. impact, shock, fall)
- ↘ manipulation of the device (e.g. opening the Qi-Shield)
- ↘ unauthorized repair attempts
- ↘ changes made arbitrarily

Cancellation / Return Form

Please enclose the completed cancellation / return form with your parcel.

Note: Please note that when you return the goods, they will be subjected to a quality inspection. A full refund will only be given after a successful quality check. If the goods are damaged or do not correspond to the original condition, we will contact you. In the case of a warranty claim, we reserve the right to rectify the defect. Please note that you have to pay the return costs yourself. It is up to you which shipping company is used for return shipment.

If you can't find the form so please download it from here:
